

## Two displays that simply win you over

The two LCDs are an absolute highlight as far as value for money is concerned. The 128 x 64 already has a frame with eyelets for easy assembly and is also available as a touchscreen. The 128 x 88 boasts a I2C interface and can be purchased with or without a backlight. The corresponding plugs are also available of course. Contact us for a **free** display sample.

Mr Heinz Sollberger will be happy to take your call or receive your email regarding data sheets and samples.
