

## Ansen – Our strong, innovative partner for crystals and oscillators

For more than seven years, we have been working closely together with the Taiwanese manufacturer Ansen Quartz Co. Ltd. We have made this name known in Switzerland and the products are valued very highly by our clients.

You can find the products/frequencies that are kept in stock at Swissdis on our **homepage [swissdis.ch](http://swissdis.ch) under 'Crystals / Link to Stocklist / all Products'.**

We can already share with you today that **the next smallest case size 1210 (1.20x1.00mm) will come on the market** at the end of 2015. After a first

development stage, the frequency range will lie at 36MHz – 54MHz. The Swissdis team are happy to help with more details or to provide samples.
