

Swissdis AG – Your partner for capacitors

Next to our wide range of resistors, we also have a broad range of different capacitors as a supplement in our passive area.

We focus on **ceramic multilayer capacitors**. We offer products from two Taiwanese manufacturers, the Darfon Electronics Corporation and the Viking Tech Corporation. We can therefore offer the first and second source from under one roof. We have the customary case sizes 0402, 0603, 0805, and 1206 as well as "High Caps", capacities > 1UF on our Swiss site.

Overview of the capacitors products:

- Aluminium electrolyte capacitors
- Ceramic multilayer capacitors
- Super capacitors (as a battery replacement)
- Tantal capacitors

Visit our website or give us a call. We are happy to help!
