

Swissdis AG – your partner for resistors

We have been working with the manufacturer Royal Ohm since 1999.

With them as a partner, it is possible for us to offer an outstanding price-performance ratio as well as flexible and fast delivery times in the SMD thick-film resistor sector.

At our site in Switzerland, we have values of the E24 services, 00Ohm – 10M0hm in the case sizes 0402, 0603, 0805, and 1206.

Apart from the thick-film resistor sector, Swissdis is your specialist for:

- Precision resistors
- Shunt resistors
- Power resistors
- Minimelf and melf resistors

Upon request, we are happy to send you product-specific information sheets on the individual products. You can also find all of the necessary details on our website [swissdis.ch](http://www.swissdis.ch).
